

The race was conceived by His Royal Highness, Prince Jigyel U. Wangchuck- President of Bhutan Olympic Committee who is a leading biking enthusiast and an all round sportsman himself. His Royal Highness led the race with a group of enthusiast in the year 2010 and was one of the few that completed in record time. The race is held on the first Saturday of every September, right after the monsoons and just when autumn sets in.

The race is not only the most challenging one day event in the world but also one of the most beautiful, when riders can take on pristine natural surrounding including some of the last virgin forests in the world. It is the most scenic race, taking one through high mountain passes that open up views of some of the highest peaks in the world.

The race is aptly named the Tour of the Dragon, not only because it is being held in Bhutan, which is also called the land of the Thunder Dragon, but also because of its difficulty.

268 Kms across the inner Himalayas of Bhutan
268 Kms across 4 high mountain passes
268 Kms from central Bhutan to western Bhutan
268 Kms, elevations ranging from 1200 Mts to 3340 Mts
